Summary

Driven Full Stack Developer with 3 years of hands-on experience designing and deploying scalable web applications using **React.js, Node.js, Spring Boot, and Salesforce**. Passionate about delivering clean, maintainable code and seamless user experiences. Proven expertise in building RESTful APIs, integrating cloud services, and managing full SDLC in agile environments. Adept at cross-functional collaboration, optimizing performance, and deploying CI/CD workflows using GitHub Actions, Docker, and AWS.

Skills

- **Frontend**: React.js, Angular, HTML, CSS, JavaScript (ES6+), TypeScript, Bootstrap, Tailwind CSS
- **Backend**: Node.js, Express.js, Java, Spring Boot, ASP .NET , C#
- **Database**: MySQL, SQL, MongoDB, PostgreSQL
- **DevOps & Cloud**: Git, GitHub, Docker, AWS (EC2, S3), Netlify, Vercel, GitHub Actions, Azure
- **Salesforce**: Apex, LWC, Visualforce, Flows, REST/SOAP API
- **Testing**: Postman, Jest, Mocha, Chai, Cypress
- **Languages**: JavaScript, Java, Python, C++, C
- **LLM**: Claude, Gemini, Cursor

Experience

One Community | **Full Stack Developer**   **Mar 2025 – Present**

- Developed scalable full-stack web applications using React.js and Node.js, delivering responsive user interfaces and efficient server-side logic for seamless user experiences.
- Designed and implemented RESTful APIs and integrated MongoDB for handling dynamic data operations with high availability and performance.
- Deployed applications using GitHub workflows and Vercel, setting up basic CI/CD pipelines for continuous integration and smooth deployments.
- Participated in code reviews and contributed to improving development standards, architecture discussions, and application modularization.
- Enhanced backend performance by implementing asynchronous handling and optimized API response times by over 30%.

CG Infinity | **Full Stack Developer – 2**   **April 2023 – Aug 2023**

- Developed REST and SOAP-based APIs with Express.js and seamlessly integrated them into scalable front-end applications built with React.js.
- - Designed SQL database schemas and optimized queries to improve data retrieval speed, reducing API load time by nearly 40%.
- - Collaborated directly with business stakeholders to understand requirements and deliver user-centric solutions under agile workflows.
- - Conducted robust API testing using Postman, Mocha, and Chai, ensuring application reliability and reducing bugs in production environments.
- - Built responsive, mobile-friendly interfaces with Tailwind CSS and Bootstrap, enhancing the UX for enterprise-level clients.

CG Infinity | **Full Stack Developer** – 1   **July 2022 - April 2023**

- Delivered essential functionalities for an energy utility project serving thousands of customers, enhancing data communication and customer self-service.
- Integrated Salesforce APIs with React.js and Node.js for real-time data sync, improving operational efficiency across customer support workflows.
- Utilized React Router and React Hooks to manage application navigation and state, ensuring a seamless single-page experience.
- Streamlined deployment workflows using Git and GitHub Actions, reducing turnaround time.

- Debugged and resolved critical bugs in production, contributing to 20% increase in application stability.

CG Infinity | Intern   **July 2021 – Sep 2022**

- Completed a rigorous full-stack training program covering modern web technologies, Salesforce development, and agile collaboration best practices.
- Built and deployed two fully functional apps—a WhatsApp clone and COVID Tracker—using the MERN stack, showcasing frontend/backend integration.
- Participated in client demos and internal QA reviews, demonstrating readiness for live project deployment and earning promotion to consultant role.
- Collaborated in agile team settings to track progress, share updates, and contribute to a shared codebase using GitHub.

Education

SACRED HEART UNIVERSITY | *Master's in Computer Science*   **Aug 2023-Jan 2025**

- Cumulative **GPA:** 3.97/4.0

PROJECTS

Energy Utility Project

- Developed a React.js website for customer self-service.
- Built a Salesforce CRM portal with Apex, LWC, and Flows for onboarding, renewals, and plan transfers.
- Integrated REST APIs, enhancing data exchange efficiency by 40%.
- Conducted customer service call testing for issue resolution.
  Tech: React.js, Salesforce (Apex, LWC, Flows), REST APIs, JavaScript, Azure, API Testing.

Recruitment App

- Tech Stack: Salesforce (Apex, Visualforce, LWC, REST API), Node.js, Express.js, HTML, CSS, JavaScript, Bootstrap
- Designed and developed a Salesforce-integrated recruitment platform to streamline job postings, applicant tracking, and custom workflows.
- Developed custom job application forms using Visualforce and LWC, enabling dynamic inputs for personalized applications.
- Integrated Salesforce APIs (REST API, SOQL) with Node.js backend, ensuring seamless data synchronization and efficient applicant tracking.
- Optimized server performance using Express.js and asynchronous operations, enhancing response time by 40%.
